Agency: NPCR

Last changed: 10/03/2020 15:25:07

Edit Set Tag NES0149

Description

This edit set includes edits that NPCR would expect a state registry to run on consolidated data. The edits are based on the NPCR requirements provided in the Required Status Table of Standards for Cancer Registries, Volume II, Version 21.

Record Layout Version 21.

NOTE: The _SYS Schema ID edits included in this edit set are for central registry use in validating schema assignment on submitted and/or consolidated records and should not be included in edit sets sent to submitting facilities.

The state registry is encouraged to review other edit sets to determine if other edits should be included in the state-specific edit set.

Required Fields but edits not included per NPCR:

Histology ICD-O-2
Behavior ICD-O-2
Birthplace
Grade Path Value
Grade Pth System
Place of Death

Required field, derived, edits not included per NPCR

Record Number Recode
RUCA
URIC
Rural Urban Continuum
Surv Date, Flag, Mos

Fields listed as RH, edits kept

Edit Set Tag NES0150

Description

This edit set is an example of an edit set that could be used by a central cancer registry to edit incoming abstracts. Although most state registries would be able to use this edit set as a starting point for creating their own state-specific edit set, state-specific customization is generally necessary for optimum use.

NOTE: The _SYS Schema ID edits included in the consolidated edit set are for central registry use in validating schema assignment on submitted and/or consolidated records and should not be included in edit sets sent to submitting facilities.

This edit set includes edits for data items that would be considered appropriate for collection of a current report of cancer from a small volume hospital by a state registry. As a result, only edits for data items that would be currently coded, such as Histology and Behavior ICD-O-3 and SSDI fields, are included. All of the data items edited are listed as recommended or required by the NPCR in the Required Status Table of Standards for Cancer Registries, Volume II, Version 21.

Central: Vs21 State Example - Incoming Abstracts

Edit Set includes these 704 Edits

Edit Set Tag MOES002

Description

This edit set is to be used to check cases abstracted at reporting facilities before export to Missouri Cancer Registry and will also be used upon upload to Web Plus. It is based on NPCR requirements, customized with Missouri-specific edits and stronger CoC or SEER edits. Any questions, please contact Nancy Rold, roldn@missouri.edu

Edit Set includes these 755 Edits

MO Consolidated Edits

Description

This edit set is based on NPCR requirements for consolidated cases, with additional Missouri Specific edits, CoC edits and

SEER edits when stronger. It is to be used in CRS Plus at MCR. Any questions contact Nancy Rold, roldn@missouri.edu.

Edit Set includes these 776 Edits
